

## Assignment2:

Use AI Pair Programmer ( either use claude dev (github), or cursor.so (paid) or Github copilot paid - students discount). You need to provide a video of you using github copilot in visual studio code and having it code some interesting projects. You can add any other coding like backend, frontend and html demos if you want.

I have developed a game Tic Tac Toe using Github Copilot and uploaded the video in youtube. Link:  
<https://www.youtube.com/watch?v=0O-hNikSbDE>

The below files which I used are uploaded here.

1. app.py
2. index.html
